

Comprehensive Compliance Monitoring and Enforcement Report

Report run on: April 18, 2023 12:48:42 PM EDT

Version 6.0

User Selection Criteria	
<div>Handler ID: NJD000730424</div> <div>Evaluation Date Range: From: 10/01/1980 To: 04/18/2023</div> <div>Only Evaluations With Violations: No</div>	
Report Results	
Number of Handlers: 1	Number of Pages: 4
Report Description	
<p>This report provides a complete listing of evaluation, violation and enforcement activities for each handler, including all orphan records. Below the handler id information, the data is presented in three sections; evaluations, violations and enforcements. Notes are provided in each respective section.</p> <p>3007 Information Requests that are not linked to an evaluation will appear below the handler universe information. 3007 Information Requests that are linked to an evaluation will appear below the evaluation information within the light blue section.</p>

CEI Evaluation	08/29/2014	Activity Location:	NJ	By:	STATE	Identifier:	001	Person:	TOPHT	Suborganization:	Found Violation:	NO
NOC Date:		Citizen Complaint:	NO	Multimedia Inspection:	NO	Sampling:	NO	Not Subtitle C:	NO	Day Zero:	08/29/2014	Focus Area:
Eval. Notes:	PSE&G Fossil (PSEG) is a SQG of hazardous waste. This site was previously inspected by the Hazardous Waste Program on 6/18/10 with no violations found. PSEG is a power plant generating electricity by using natural gas and kerosene. There are three electricity generating units on site. No hazardous waste is generated from the units or process of generating electricity. PSEG has a wastewater treatment system (WWT) for unused city water from the air emissions equipment on site and any run off collected in retention basins around the electricity generating units. The unused city water is extra water that is not needed for the air emissions equipment and does not come in contact with the equipment. WWT is an oil water separator to remove any lube and hydraulic oils used on site that might come in contact with the wastewater. If runoff water found in the retention basins or secondary containment has an oil sheen, it will be collected and shipped off site as oily water. All clear water is sent to the WWT. Periodically debris and dirt (solids) accumulate in the WWT cotnainment basins which are removed and managed as non-hazardous waste. However, these solids are removed infrequently because most of the wastewater is city water and rain water, therefore, minimal accumulation of solids occur in the basins. The solids are tested prior to disposal per PSEG's NJPDES permit. However, the analysis conducted per the NJPDES permit of these solids was not sufficient for hazardous waste determination. As a result, PSEG has agreed to analyze the solids for TCLP when enough of the solids have accumulated. Lastly, the clean water is discharged to the Hackensack River under their NJPDES Permit. Oil from the oil water separator is shipped off site by Clean Harbors. The WWT also has a lab for testing the wastewater, however, this lab does not generate hazardous waste. Hazardous waste generated on site includes waste paint from maintenance of the site, broken batteries											

No Linked Violations

CEI Evaluation	06/18/2010	Activity Location:	NJ	By:	STATE	Identifier:	001	Person:	NOMPK	Suborganization:	N	Found Violation:	NO
NOC Date:		Citizen Complaint:	NO	Multimedia Inspection:	NO	Sampling:	NO	Not Subtitle C:	NO	Day Zero:	06/18/2010	Focus Area:	

No Linked Violations

Note: Penalty information associated with an enforcement action is reported with the enforcement action. For enforcement actions associated with multiple violations, the penalty information will be reported with each violation, however, the penalty is only assessed once, regardless of the number of violations associated with the enforcement.
